

Dear Friends,

12/04/2014

We at Sunlit Future Auroville would like to acknowledge and thank AVI Holland and DFLN to fund a Solar Lighting system project and solar powered drinking water pump to provide reliable / robust and a permanent solution for providing electricity to the remote area of Basgo village in Leh district of J & K in India.

The region of Leh has plenty of sunshine but due to the extreme high altitude and rough terrain providing conventional power is difficult and challenging and in most of the cases where power has reached, the power comes only in summers as the hydro based electricity generation does not happen since the water freezes as temperatures reach – 35 degree

This contribution to the Village of Basgo will benefit the people immensely since it brings proper infrastructure to provide basic lighting and water for daily use, a lot of worry and tension goes away from daily struggle of fighting for survival to get power and water.

We sincerely thank AVI Holland and DFLN to give sunlit future this task to undertake this work and provide a robust solar system for the village of Basgo.

Our association with AVI Holland and DFLN started less than a year before and we truly acknowledge their contribution to see in us a potential partner to undertake such a project.

Our aim has always been to work in areas such as Basgo to provide lighting solutions and change the profile of the people and i am happy to say that we love the challenge to go to such remote locations and prove a point to the world that in areas above 13000 feet above sea level have reliable source of power using non conventional energy for 365 days a year by harnessing the power of sun.

A message goes to the whole world to adopt small steps towards a decentralize grid power based on your own generation of power using non conventional source of generation and reduce your carbon footprint. A point made possible by small but meaningful contribution by AVI Holland and DFLN which brings about a change in the lives of many

Thanking the complete team

Rishi Kapoor
